## Who We Are?

We are Cheport s.r.o., a private Czech company founded in 1991. From the very beginning, we have focused on the production of cleaning and disinfecting agents.

**IDENTITY AND TRADITION** is the foundation of our company. We are proud of the family atmosphere that prevails and our Moravian roots. **QUALITY** of our products and services is our top priority. We believe that tradition and experience in manufacturing and management lead to the best results, while we also emphasize control and continuous improvement.

**CUSTOMER** is our priority; our efforts are mainly directed towards them, whether they are a multinational giant or a local partner. Our individual approach is our strength.

**EMPLOYEES** are those who help us create and improve our company, and as such, they are very important to us. Appropriate remuneration, a human approach, and a pleasant environment are a given. The organization is committed to communication and ensuring the participation of employees and their representatives in addressing health and safety issues.

**WORKPLACE AND PRODUCT SAFETY** is an inseparable part of the company's policy. We invest significant energy and resources to ensure safe and healthy working conditions concerning accident prevention, work injuries, and health damage.

**ENVIRONMENT** concerns us all. We seek effective ways to improve the environment. We prefer effective prevention of accidents, continuously reduce the risks of serious accidents, and mitigate the negative impacts of our activities on the environment. We eliminate potential impacts of accidents on employees, the surrounding population, the environment, and property in the vicinity of the company premises.

**CONTINUOUS IMPROVEMENT** is important to us not only because we are obliged to do so by the requirements of ISO 9001, ISO 14001, and ISO 45001 standards but also because we know from experience that growth in all areas is essential for market competitiveness, maintaining the quality of services provided, as well as for the satisfaction of employees and customers, and ultimately for acquiring new customers. Management is committed to the ongoing elimination of hazards and reduction of risks and aspects throughout the entire management system as part of continuous improvement.

### **REQUIREMENTS AND INTERESTS OF STAKEHOLDERS**

We are committed to complying with legal requirements and other regulations, obligations arising from ISO standards, and other binding requirements of stakeholders.
